DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 34-37, 39, 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Norris et al. (5,748,042).

Regarding claims 1, 34, Norris et al. (Figs. 2/3) disclose an amplifier circuit comprising: a field effect transistor (22) read as a semiconductor devices having a control terminal (gate) and two conducting terminals (drain and source) wherein the first and second conducting terminals coupled to a ground potential and the output (Vout) is coupled to the second conducting terminal (drain); an RF source (Vin) coupled to control terminal (gate) of semiconductor devices (22); and sub-harmonic network (21) can be read as a filter coupled to the second conducting terminal (drain).

Regarding claims 2-4, 35-37, wherein the RFin is capable of receiving different signals having different waveforms and the type of wave used is an intended use of the invention.

Regarding claims 5, 6, 39, 40, wherein semiconductor device is a field effect transistors (22). FET and MOSFET are considered the same.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 8, 11, 19, 20, 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chawla et al.

Regarding claims 7, 41, it is known in the art that field effect transistor and bipolar transistor can be used interchangeably.

Regarding claim 8, the type of transistor used is considered a matter of design choice in the absence of unexpected result.

Regarding claim 11, Chawla et al. disclose the claimed invention except a second filter having connection as claimed. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide an additional filter since an additional filter would only enhance the circuit ie. filter out noise or filter out unwanted signals etc.

Regarding claims 19, 20, the output of a RF signal source is either fixed or varies depend on the circuit design and the intended use of the invention.

Allowable Subject Matter

Claims 21-33, 51, 52 are allowed.

Art Unit: 2817

Claims 9-16, 38, 42-50, 53-57 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 9, 10, 12-16, 21-33, 38, 42-49, 51-57 are allowed over the prior art because none of the prior art disclosed or suggested showing the particular structure and/or operation recited in these claims namely:

Claims 21-33, 51, 52 call for, among others, a subharmonic filter and a low frequency termination circuit having the connection and functions as claimed.

Claims 9, 10, 42, 43, 46 call for, among others, a plurality of discrete transistors arranged in parallel.

Claims 12-16, 38, 44, 45, 47-49, 53-57 call for, among others, a resonant inductor circuit having the connection and function as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
